

Website for Commuters: www.pendleri.at

Since the enlargement of the EU, mobility has increased immensely. A website for commuters in the Austrian-Slovakian border region has been established for this reason.

People who immigrate for professional or personal reasons often find themselves in unexpected situations. This often pertains to vehicle registration, medical insurance, tenancy law, etc. Guidebooks on these topics will be available for download on this website.

The purpose is to offer easy to understand information on Austrian Labour and Social law in order to enable workers and employees to be better informed of their rights at work. This is one way to win the fight against wage and social dumping. Additionally, the website would provide information on the Austrian Tenancy Law so as to avoid possible exploitation in this area.
